Microphone

## Installation

According to the position of cable, drill two holes in the wall, and make sure the distance between these two holes matches the measurement indicated on the figure.

Insert plastic wall anchors into drilled holes.
Turn ST4x20 crosshead screws into plastic wall anchors. Do not fully tighten the screws, and leave some space for placing devices.
Connect cables to corresponding interface to test device. For further details, see "Device Wiring" section.

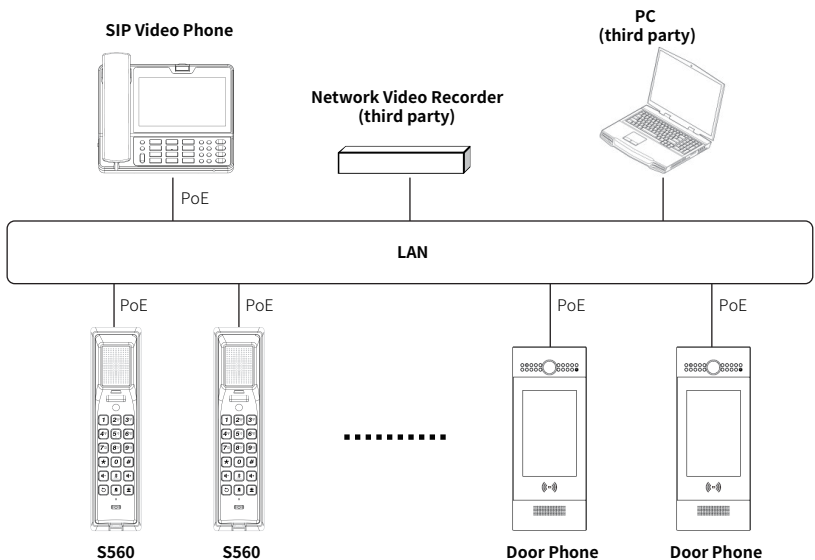

Match up the screw holes with the screws, and then press down the device to attach device securely to the wall.
